# Remote control synchronization

---

## Synchronize the remote control with the set-top box.

*Using your TV remote control, select the set-top box's HDMI port in the "Sources" menu*

1. Align the new CTAL remote control with the set-top box.
2. Press and hold the **OK** and **APPS** buttons together for **5 seconds**, or until the STB power button **flashes twice** to indicate successful pairing. Release both buttons.
3. The STB's power LED should light up blue. Once successfully paired, the pairing screen will disappear from your TV screen.

Visit our Website  
[ctal.ca](http://ctal.ca) and see our  
synchronization video.

# Remote control functions

## 7Y version

15. Access to channel guide.
16. Back to previous channel.
17. Browse channel.
18. Switch volume to mute.
19. Activate and deactivate subtitles.

### "A" et "B" Button

#### A button

- Displays navigation menu at the bottom of your screen.

#### B button

- Open direct access to the recording menu.

#### \*Voice command

- The voice control function is Google Assistant, which provides access to the set-top box's applications. It does not control CTAL's TV Service. For more information, please visit [assistant.google.com](https://assistant.google.com)

### Helpful hints

- CTAL is in no way responsible for subscriptions to streaming content applications.
